WHY YOU SHOULD ATTEND

CIO & CISO FRANCE

VIRTUAL SUMMIT

Develop an Innovative IT and Security Strategy to Accelerate Your Business

The IT and Security department has become a crucial element in keeping their business moving by testing and embracing new technologies that help to keep employees connected remotely. In a world that feels like it's changing by the hour, C-level and Senior IT Security Executives are now under more pressure to keep ahead of competitors and continue to drive business growth whilst keeping costs down.

"We're living through a once-in-a-lifetime moment in history that brings with it both challenges but many possibilities"

And attending the CIO/CISO France Summit will give you the chance to engage in peer-on-peer networking, whilst discussing the issues currently affecting senior executive from a variety of industries across France.

Topics to be discussed will include:

- COVID 19 Lessons Being Learned
- A Practical Approach to Zero Trust
- Hyper-personalisation: Using AI to Drive the Bottom Line
- Accelerating Transformation Through Crisis
- How Deep and Shallow Learning Can Work Together to Create Cost Savings
- Digital Workplace – What Does the Future Hold?
- Focusing Upon Customer Experience

As an IT and Security leader, now is the time to produce real business value for your organisation. We at CDM Media know that for you to take time out of your busy schedule, it must be time well spent. The CIO/CISO France Summit agenda offers a balanced schedule of focused learning sessions, one-on-one meetings and networking opportunities that will maximise your time and efforts, providing you with ideas and strategies truly capable of changing business practices, all from the safety and comfort of your home.

Very well organized! The subject matter was timely for pretty much everyone concerned. The right people were present and in the appropriate quantity"

- CISO
